ADDITIONAL INFORMATION

A Junior MERN Stack Web Developer typically possesses foundational knowledge in HTML, CSS, and JavaScript and uses these skills along with the MERN (MongoDB, Express.js, React, Node.js) stack to build dynamic web applications. They're often involved in tasks like database management, API development, implementing front-end features using React, handling server-side logic with Node.js and Express.js, and collaborating with senior developers or teams to deliver functional and scalable projects. Junior developers in this role continuously learn and adapt to new technologies and best practices in web development to grow their skills and contribute effectively to development projects.

OBJECTIVE

i am specializes in building web applications using MongoDB, Express jt, React, and Nodejs. They work on the front and back end of websites, handling data storage, server side legic, and user interfaces. Typically, they assist in developing and implementing features, troubleshooting issues, and collaborating within a team to create efficient, scalable web solutions
